

## IPI Protective Padding

IPI can satisfy almost any wall, fence or other surface padding requirement for indoor or outdoor sports facilities. From standard 2' wide x 6' high x 2" thick solid color wall padding sections to custom designed wall, pillar, stage or fence padding, IPI has padding options to meet every applicable building code requirement. Contact a protective padding specialist to work with you to design a padding system, simple or complex, to maximize player safety in your facility.

### Indoor Graphic Wall Padding

Let our graphic design staff work with your team to create the perfect custom graphics to enhance your facility and help build team spirit. There is no limit to the range of colors that can be printed with our high tech digital printers. All printed graphics have a thick, clear liquid laminated coating over the printing to create and maintain a sharp clear image. In most cases, the design work done by our art team is free.

### Indoor Solid Color Vinyl Padding

Choose any single color or mix multiple panel colors on a single installation. With 18 colors to choose from, you have a wide range of options. Solid color padding can also be used in conjunction with graphic or lettered padding to fit your facility needs and budget. Solid color padding is often the choice when there is a large number of cutouts, custom sizes, doors, columns or other obstructions that might make graphic padding a challenge. As with other padding styles, our staff will help you select the appropriate specifications to meet your facility's needs and local codes.

### Stadium, Ball Park and Field Sports Padding

Virtually any outdoor surface that could come in contact with players can be padded including walls, fences, dugouts, poles and columns. IPI standard outdoor flat surface wall padding is constructed of 3/4" FDN CCA treated southern yellow pine plywood with 3" anti-microbial urethane foam attached with moisture proof adhesive. Solid color and lettered styles are covered with 30 oz. flame, mildew and UV resistant vinyl. Outdoor graphic printed padding is covered with 14 oz. flame, mildew and UV resistant vinyl with a clear, non-yellowing protective liquid laminate protective coating. Vinyl has multiple moisture weep holes and uses 100% stainless steel assembly staples and fasteners. Select flange style, Z-channel, chain link or other attachment styles appropriate for your project.
