

## Custom Wall Mount Structure

Choose from Stationary, Side Fold or Fold Up, each with your choice of backboard, rim and backboard padding found on page 14. Select setback from wall to face of backboard from 4' to 10' (1' to 10' on stationary systems). All structures are constructed of 1 1/2" schedule 40 structural pipe (1.9" diameter) and welded steel brackets and are assembled using 1/2" diameter grade 5 hardware. Additional features include 2" x 8" clear coated, southern yellow pine wall boards, 3/16" proof coil support chains with chain tensioners and a durable powder coated finish in your choice of colors on all steel surfaces. Custom wall mount structure is built to order based on customer supplied gym dimensions and is not returnable. IPI does not provide wall anchors.

### IP10WB Stationary

This is the least expensive style of wall mount structure and is perfect for facilities where there is no need to move the backboard and rim to eliminate interference with other activities taking place in the gym. Backboard face can be positioned anywhere from 1' to 10' from the wall.

### IP15WSF Side Fold

Manually swing the backboard and rim to the left or right close to the wall when not in use. Includes heavy steel pivots and telescoping crossmembers that lock the unit in the stored or the playing position. Backboard face can be positioned anywhere from 4' to 10' from the wall.

### IP12WF Fold Up

Structure is designed to swing upward by use of a Manual Winch (BA925) or Electric Hoist (BA975). See page 13 for details. Electric Hoist can be operated using a variety of optional control systems found on page 12. Backboard face can be positioned anywhere from 4' to 10' from the wall.

## In-Stock Telescoping Wall Mount Structure

No need to guess at the desired distance from the wall to the face of the backboard, to wait on custom structure delivery or to deal with expensive field modifications in cases of measuring errors. Choose Stationary or Side Fold systems with wall to backboard face distance from 4' to 12'. Compatible with either of the 42" x 72" rectangular backboards and any of the rims found on page 14. Structure telescopes at installation prior to being bolted in place in the perfect location. Choose 4' - 6', 6' - 8' or 8' - 12' extension options. All in-stock structures have a silver gray powder coated finish and heavy welded brackets. Additional features include clear coated 2" x 8" southern yellow pine wall boards, 3/16" proof coil support chains and welded 2" extension structural members. Consult with one of our product specialists to select the model that best fits your needs.

## Shooting Station Packages

In addition to custom built and in-stock competition wall mount structures, IPI offers elementary school, side court, rec center and general purpose structure, backboard and rim packages to fit any need. Find fixed height and height adjustable shooting station packages on the web at [www.bisoninc.com](http://www.bisoninc.com).
