

System shall include two posts, net tensioning winch, competition net, side lacing ropes, center court hold down strap, and anchor. Posts shall be constructed of specially designed 3" diameter aluminum extrusion to maximize strength and eliminate rust. Posts shall also feature top cable pulleys, 1/2" diameter permanently fixed net side lacing bars, and a dark green powder coated finish. One pole shall include a brass internal top net cable tensioning device with removable handle. Posts shall be designed to install directly into concrete footing, but may be made removable with use of option TN23 or TN235 ground sockets. Net shall be official 42' long and 42" tall allowing the top of the net to be official 36" from the playing surface at the center.
