

Portable basketball systems are a popular choice when ceiling or wall mounted systems are impractical or impossible. All IPI portables are padded for player protection, roll on floor-friendly casters for transport and storage and have enclosed ballast compartments. Choose from our wide variety for international competition to elementary school use and anywhere in between. Call for assistance to select the portable that best fits your program's needs.

T-Rex Americana™

Designed for the highest level of play including Division I NCAA, **Americana** features a 6" square, heavy-wall beam with laser cut support structure for rigidity and an 8' safe play area. Other features include integrated ballasted base, 3" thick front base padding system, 180° breakaway goal and spring counter balanced automatic base control transport and setup system with eight, 8" diameter, 2" wide non-marking wheels. Order **T-Rex International** when internationally preferred 10'8" safe play area is desired.

T-Rex 96 Competition™

A great balance between competition level features and budget conscience design. T-Rex 96 has a full 8' safe play area and is suitable for aggressive play at all levels where 10' 8" safe play area is not required. Order **T-Rex Side Court** for same portable but with 5'6" safe play area.

T-Rex 54 Club™

Many of the same features as larger T-Rex portables, including a full size competition glass backboard but with a reduced base size and 4'6" safe play area. Great for rec center and side court play.

T-Rex Club

VB8100 Arena II™ Freestanding Portable

Large arenas and multiuse facilities where elite level volleyball is played but where floor sockets or anchors are difficult, expensive or impossible due to ice rink refrigerant lines, portable flooring systems, upper floor location or other constraints may find this system an excellent option.
