

IPV4000JS OFFICIAL'S PLATFORM FOR IPV4000 CEILING SUSPENDED VOLLEYBALL SYSTEMS

Official's platform shall be constructed of 1" OD, 11 ga. steel tubing formed to create a safety railing welded to a tubular base framework consisting of 2" x 2" and 2" x 3" 11 ga. tubing. Platform floor shall be 10 ga. steel and provide an area approximately 20" wide by 21" deep for official. Access to the platform shall be by means of a retractable, hinged ladder fabricated using 1" diameter 11 ga. steel tubing. Once official is positioned on the platform, the ladder shall be folded up and locked in place by the official forming the 4th side of the safety railing. Official platform height shall be adjustable to preferred height at time of original installation. Official stand and required attachment components shall be fully padded meeting all NCAA and NHFS rules. Padding shall be available in 17 optional colors. All steel components shall have a polyester powder coated or zinc plated finish. All hardware shall be grade 5 or better.
