

# GYM EQUIPMENT CONTROL DEVICES

IPI offers a wide range of options to control the electrical devices in your gym. From traditional wall mounted key switches to our Gym Command™ 7 Color Touch Screen you will find an operating control system that fits your needs and budget. Consult an IPI Dealer or factory technical consultant to assist you in selecting the control system for your facility.

## Ceiling Suspended Scoreboard Mounting System

Most gymnasiums can be custom mounted on any of the IPI ceiling suspended basketball structure designs. Lack of appropriate wall attachment space, visual interference when lowered, or location of scoreboards in multipurpose gyms are the most common reasons for considering mounting scoreboards from the ceiling and possible retraction when not in use. Consult an IPI engineer for details and required information.

## Gym Command™ Plus System

The newest addition to our wall mounted control system lineup offers the convenience of touch screen technology, easy, in the field, programming, and maximum flexibility. All this at a price below many similar touch screen gym control systems. The 7" diagonal color screen and software allows programming individual devices or groups of devices to be operated at the same time when desirable. Touch Screen (IPGCLUSTS) has a molded high strength ABS plastic, 8 5/8" x 4 1/2" and 2 1/2" enclosure and mounts on the wall. The relays are housed securely in a 12" x 16" x 4" hinged steel enclosure (IPGCLUSR) typically mounted in a back room or closet. Contact an IPI Dealer or factory technical consultant for details and complete specifications and installation instructions. Gym Command Plus carries a 2-year warranty.
